Women's Health with Dr. Felice Gersh - Seminar Recording

In this 133 minute seminar recording Dr. Felice Gersh will cover new understandings of the foundations of female cardiovascular health and the impact of menopause both directly and due to the relationship of estrogen with the gut, the immune system and circadian rhythm and how they interact to impact female cardiometabolic status. She will also help explain the link between estrogen, the circadian rhythm and metabolic health and why this is important for reproductive success and enhanced survival and what to do at the onset on Menopause to ensure **has completed the following course on 4th September 2018**
